

I would like to comment on my current Airl radio station. Our Airl station serves our community by bringing positive messages and music. We live in a small town without much variety for this type of music and if our station is displaced by a LPFM broadcaster providing other programming our station would be greatly missed. I work with youth within the community and within my church so I see first hand the positive impact and choices todays teens are making in part of the positive, Godly music and messages that are available to them. Again, we are a small community so our choices are limited. That is why I believe our Airl station serves the community as a public interest. Thank you for your consideration.
